# GUNS IN YE OLD WEST

My dear friend, George Clearwater, is an excellent gunsmith. Any time I have trouble with my revolvers or rifles, I hasten to his shop and watch an expert efficiently spot the trouble, and then remedy it. Needless to say, he also knows the history of guns and he has been kind enough to consent to this interview:

"When people talk about the Old West, they somehow seem to visualize our hero with a six-shooter in each hand, blazing away with deadly accuracy at either hostile Indians, rustlers, claim jumpers, card cheats or any other variety of villain. What they seem to forget is that before the revolver using the metallic cartridge appeared Before the metallic cartridge, our hero did on the scene, our hero was limited to other weapons.

Before the metallic cartiridge, our hero did have a revolver or a pistol using the percussion cap. And before that, alas, he had his trusty flintlock. Though one often wonders how trusty it was in a case of emergency. If he kept it in a holster or in his pocket, he had to tug to get it out in time to save his life. Handy place was a belt, though it could drop down and get lost-which was embarrassing when he faced the villain for a show-down.

Anyway, the flintlock was now in his hand. And he pulled the trigger. In movies and on the TV, the hero is lucky. It goes off the first time. But not so often in real life. If he missed fire as the Indian charged him, intent on getting a scalp, what then?

Out comes his knife, and then the two go in for close-quarter fighting. No matter what you did to the enemy, the chances are his knife left some marks upon you. This prompted one authority to point out that the knife was no answer to the problem of how to mix in a fight and yet stay bodily out of it at the same time I have seen some expert knife throwers. This has made me wonder: Why doesn't somebody come up with a hero who keeps a half dozen knives in his belt? And throws them from a distance with deadly accuracy

Now, we go back to our hero with his flint lock pistol. And there are three Indians going for him. He fires once, and by the time he reloads, an arrow may get him if he is exposed. Make no mistake about it, his Indian opponent could get an arrow out of the quiver, place it in position, aim and fire, before our hero reloads. And this raises a very simple question: Shouldn't our hero carry a brace of pistols? If he could afford it, that would give him two shots. Then he can throw his knife at the remaining Indian.

How about giving him four shots? That could be done by having him carry two double-barrel flintlock pistols. And they were in existence in that period. You still can buy them. But actually, our hero carried a single-barrel pistol. Some of the English gunsmiths did make flintlock pistols having three barrels. You turned by hand the next loaded barrel to position it after firing the previous one. This at once reminds you of the Pepper boxes used by a later generation.

If you are interested in old flintlock pistols, and have a lot of money to spend, you can purchase-provided one is for sale-a revolving flintlock pistol made by Elisha Haydon Collier, who was a Bostonian. After first trying to interest various people in this country in his idea of a revolving flintlock firing system, he went to England. His gun was very popular and was used by the English army in India. It was considered the finest weapon of its kind.

After his success in England and France, Collier closed his gun shop in London and returned to the United States. He set up a similar gun business in Boston for the purpose of making his revolving flintlock guns. These had such improved features as a self-priming pan and gastight joints between cylinder and barrel, formed by cramming forward the cylinder counter-bored at the forward end to mate with the breech end of the barrel. A novel way of rotating the cylinder was used. Upon releasing the trigger after firing, it was indexed by tension of a spring that had been previously hand wound.

Can you visualize our hero fighting the Indians with this type of pistol? Which would have been deadlier: The wounds or the surprise?
